EXPERIENCE

Computer Science Curriculum Director @ Edtekh LLC July 2013-Feb 2019

- Developing and overseeing the strategy and implementation of Computer Science curricula for elementary school age students, culminating in portfolios of their projects.
- Collaborating with administration to enhance effectiveness of instruction for students using digital teaching methods.
- Researching and recommending the purchase of digital knowledge based technologies.
- Designing and improving curricula facets that strengthen technical knowledge and educational results.

PROJECTS AND CONTRIBUTIONS

E-Commerce Storefront Website

Github Repo: <https://github.com/kamclark/SportsStore>
Web application simulating online storefront using MVC pattern. Able to browse by category and add/remove items to a cart. Administrative options available to add and delete items available in store database.

C# | HTML | .NET | SQL | Bootstrap | Git

Facial Detection Application

Github Repo: <https://github.com/kamclark/FaceDetector>
Script that allows you to load an image and produce a greyscale version for effective face detection. Counts faces, draws a visible outline around detected faces and allows for creation of new image files based on cropping original images . Image processing uses Python's OpenCV module.
Python | Git

Baseball Statistic Simulation

Github Repo: <https://github.com/kamclark/Baseball>
Application simulating the outcome of a baseball plate appearance based off of most recent 3 year averages from MLB's stat database and random number boundaries.
C# | Git | SQL

Calculator

Github Repo: <https://github.com/kamclark/Calc>
Desktop application of a full functioning calculator with basic arithmetic capabilities as well as scientific calculations available.
C# | Git
